E & E Potts

Website Specification

Introduction

This document outlines the functionality that will be available on the E & E Potts website. The site will be written in PHP and use a mySQL database. Drupal will be used as the content management system (www.drupal.org).

The focus of the website will be to easily navigate users to products and then if a user is interested in a product, direct them to the contact us page. All content on the site will be manageable via the administration area, a *username* and *password* will be used to access the admin area, these details be provided on delivery of the project.

E & E Potts

Website Specification

Global site elements

There are three page elements that will be present across the site, the *header area*, the *left* and *right columns* and the *footer area*.

The header area will contain the site logo, links to the contact page (possibly including social media links such as facebook and twitter), the main site navigation and search field. The footer will contain links to contact form and copyright details.

Header

<div>HEADER</div> <div>Will contain logo and calls to action for <i>Contact us</i> and <i>company phone number</i></div>
<div>MAIN SITE NAVIGATION</div>
<div><div>Search</div><div>-- Category -- v</div><div>Go</div></div>

Left & Right Columns

The left column of each page will contain a drop down selection box for product brands and a list of product categories. The right column of each page will contain a list of featured products which will act as quick link, which products are displayed within the list will be configurable via the administration area.

Footer

Footer navigation copyright info

Standard Pages

Standard pages follow a specific template layout, each page will contain fields for a *title*, *body* and *image upload*, unlimited standard pages can be created and managed via the admin area. When the site is initially created it will contain standard pages for *about us* and *services*.

Gallery

Via the administration area users will be able to create gallery albums, this will consist of a gallery title, options body text and unlimited images.

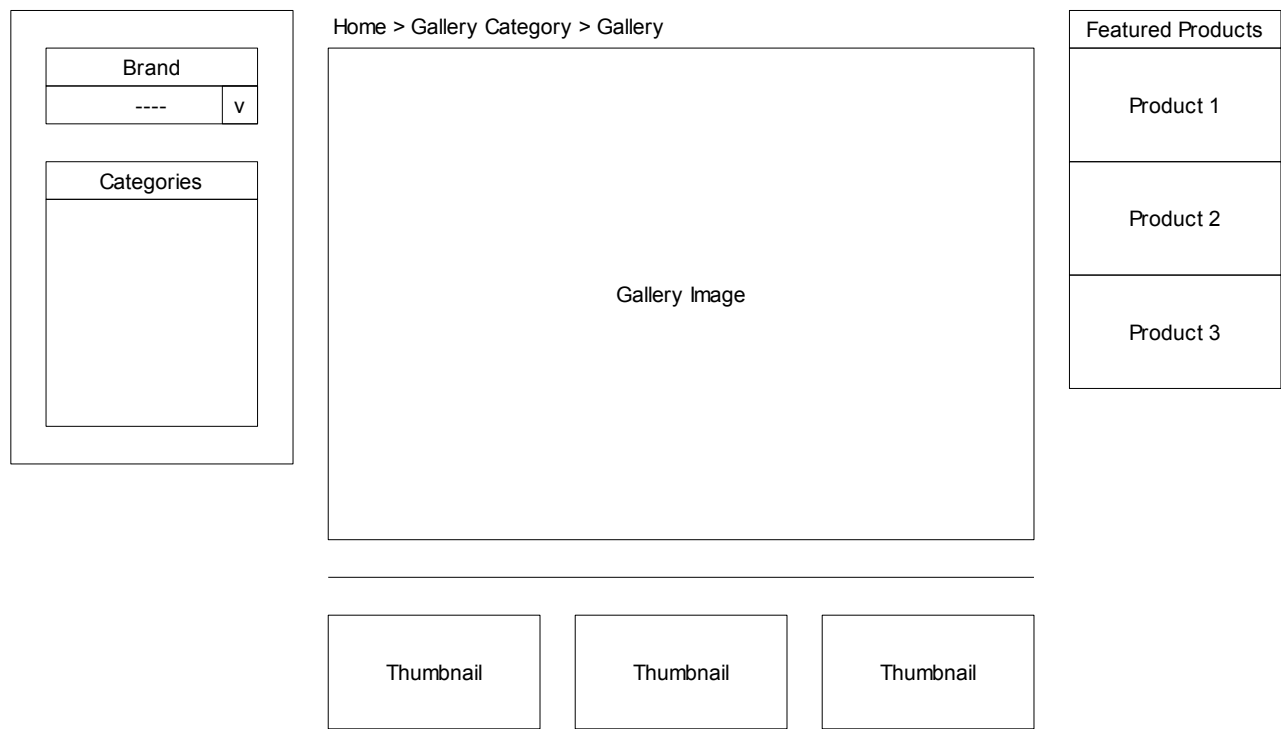

Gallery landing page

The gallery landing page will contain thumbnails for each gallery album, if the amount of albums is greater than six pagination will be implemented to allow the user to navigation through archive content.

Gallery page

Each gallery page will display one main image and individual thumbnail images below, if the user clicks on a thumbnail it replaces the main image.

Products

Admin users will be able add unlimited products via the administration area, each product will have the fields;

- Name
- Description
- Price
- Part number
- Images

This field will allow for unlimited uploads, each uploaded image will be part of the over all gallery for the product.

- Brand

A category that can be managed via the administration area.

- Type

A category that can be managed via the administration area.

- Related products

A list of check-boxes, each item in the list will be a product which already exists. Related products will be displayed underneath the main content on the product page.

Product listing

The listing page will display all the products available, or if reached via one of the one of the search options display a filtered list of products.
